 How to make a medical appointment in 4 steps:

First, prepare the information needed to make an appointment:

Your health insurance card / identity card or social security number.

The name of the doctor or specialty sought (general practitioner, cardiologist, etc.).

Your schedule or your availability.

1 Go to the appointment booking site

Not all doctors are necessarily registered on online appointment booking platforms. In some cases, you may simply need to enter the name of the doctor or specialist, along with the desired town or city, into a search engine.

✓ OPEN THE APPLICATION OR WEBSITE:

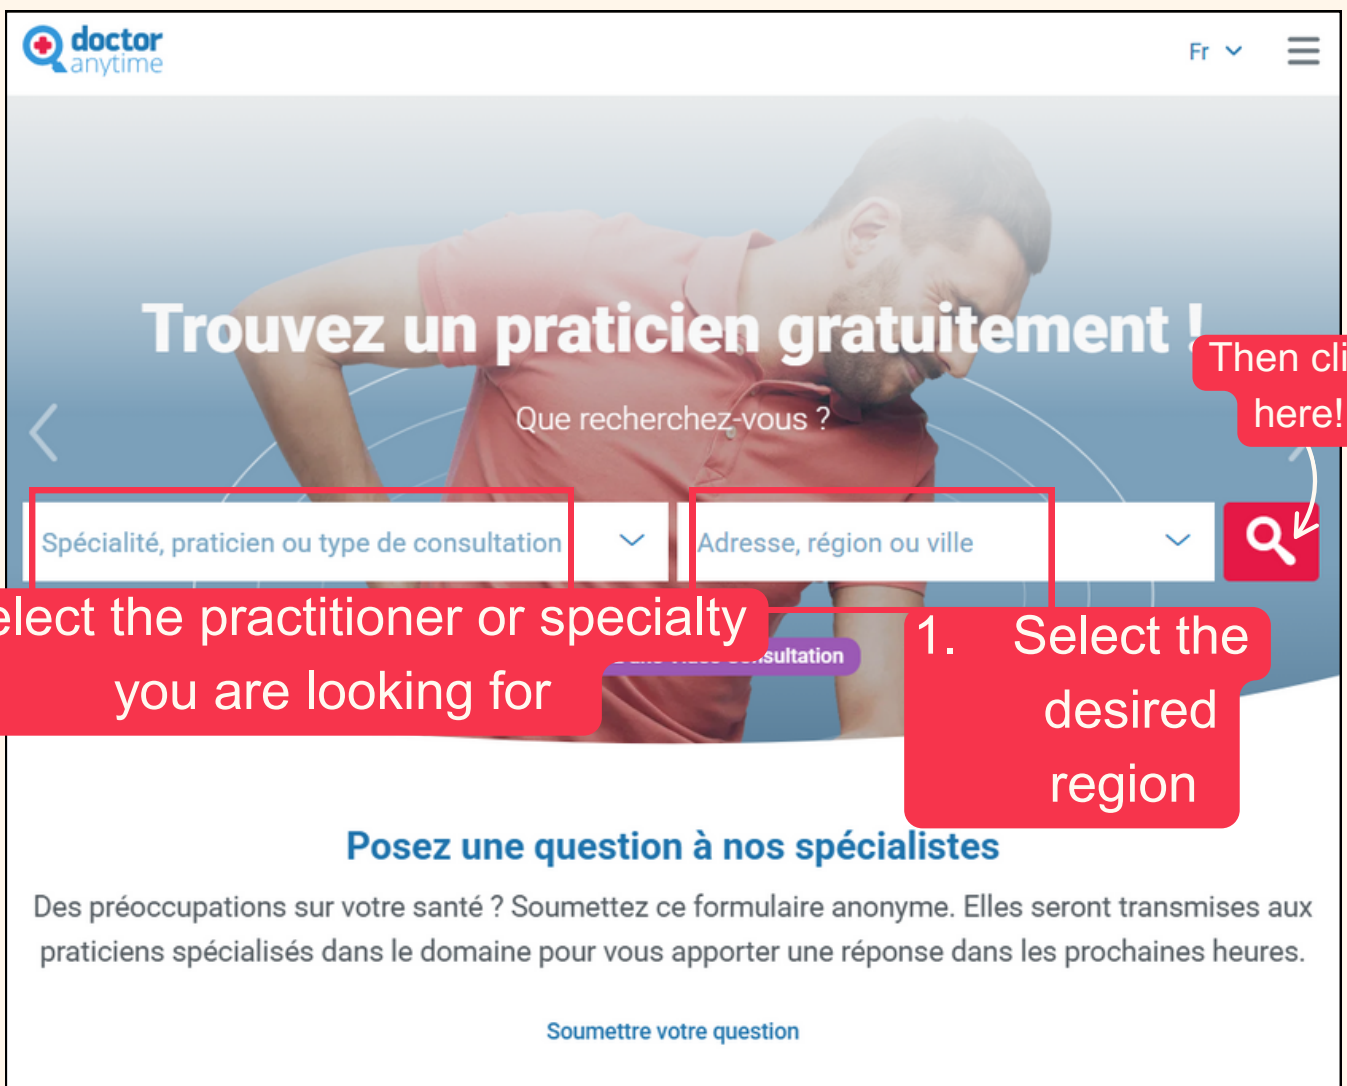

- DOCTOLIB, MAIIA, OR DIRECTLY THE MEDICAL PRACTICE WEBSITE (FRANCE)
- DOCTORANYTIME.BE, DOCTENA, MYCONSULTATION OR DIRECTLY ON THE DOCTOR'S OFFICE WEBSITE. (BELGIUM)

Tip: Only use known and secure sites (as listed above, or those referred by your doctor/healthcare provider). See “Online Scams” fact sheet.

Find your doctor or healthcare professional

-  Type the name of the doctor or the specialty you are looking for in the search bar, as well as the area you are interested in.

The screenshot shows the 'doctor anytime' website. The main heading is 'Trouvez un praticien gratuitement !'. Below it is a search bar with two input fields: 'Spécialité, praticien ou type de consultation' and 'Adresse, région ou ville'. A red callout bubble points to the search button with the text 'Then click here!'. Two red callout boxes with white text provide instructions: '1. Select the practitioner or specialty you are looking for' pointing to the first input field, and '1. Select the desired region' pointing to the second input field. Below the search bar is a section titled 'Posez une question à nos spécialistes' with a description and a 'Soumettre votre question' button.

-  Check that you have chosen the right professional and the right city.

Choose the appointment

-  Look at the available dates and times offered by the doctor.

 **Choose the time slot that suits you.**
